

HOW ARE INJECTIONS IN SPINE DONE FOR PAIN RELIEF?

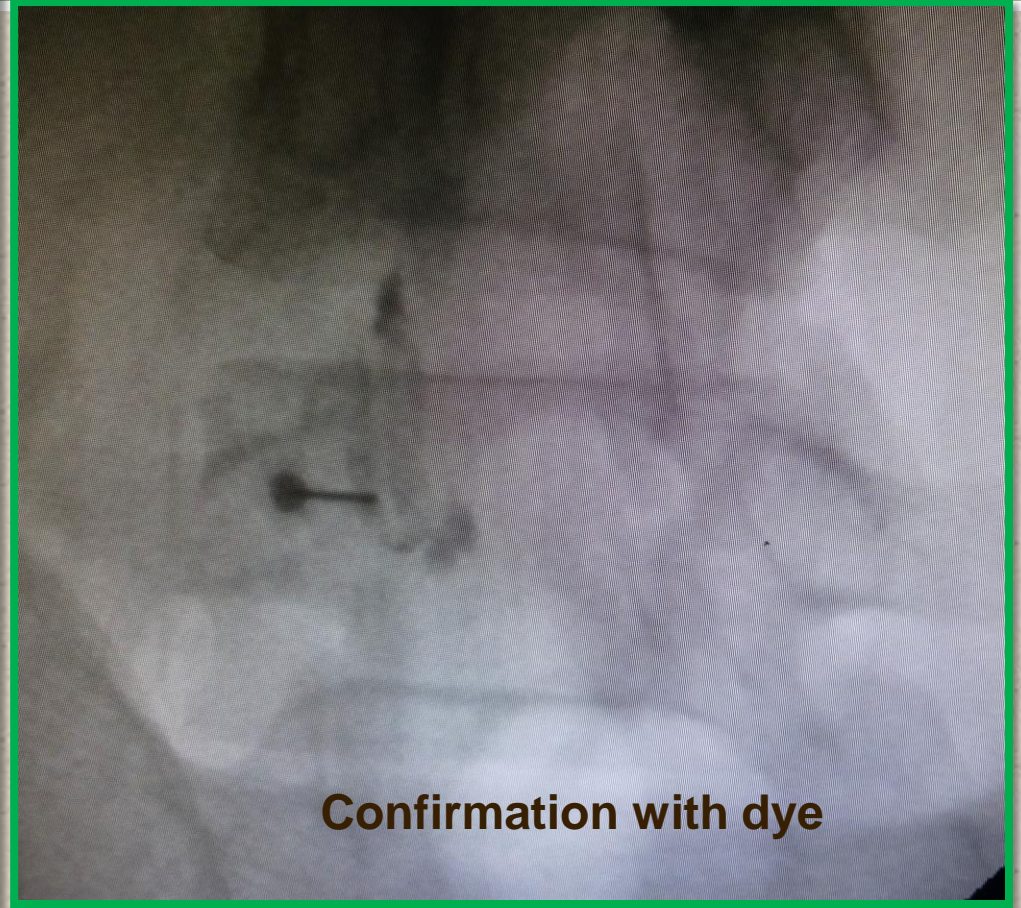

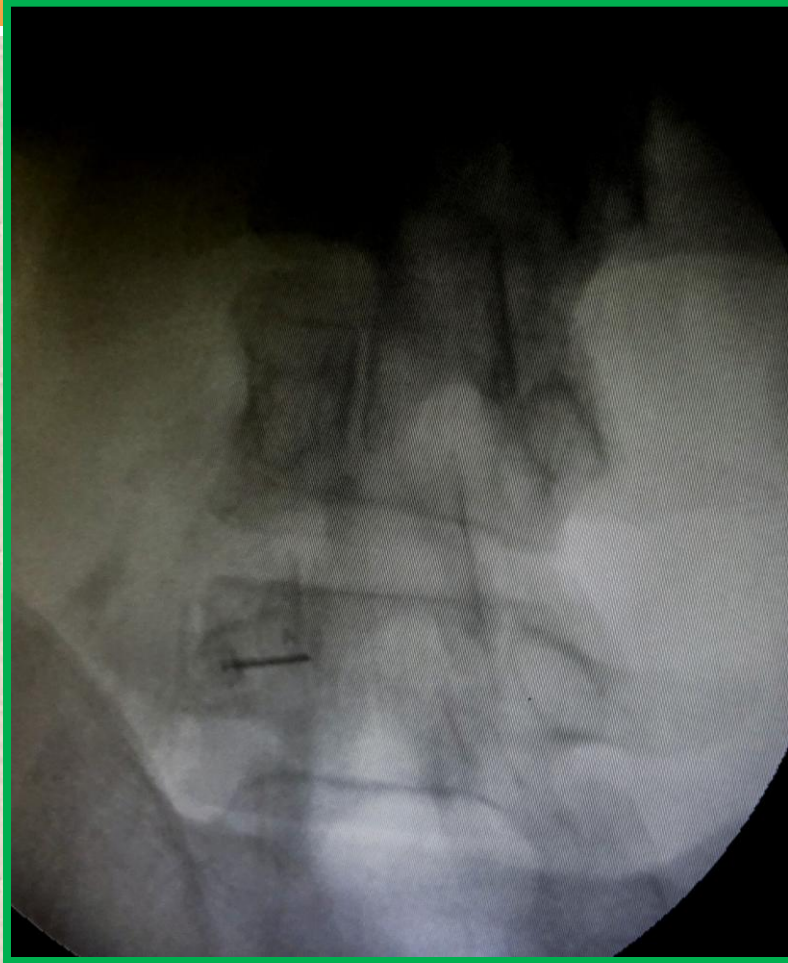

- Please meet the doctor who will examine you and decide whether the injection is needed and what relief you can expect
- Some investigations maybe needed before doing the procedure
- It is usually done under Imaging (X-ray) guidance, using a dye for confirmation
- It is a daycare procedure

Left L4-5 injection

Left L4-5 Facet Joint needle position

Confirmation with dye

Post spine surgery Right L5-S1 injection
